

There are only 10 types of people in the world: Those who understand binary and those who don't

(AND OR B) AND (NOT C)

$p \Rightarrow q$

read "p implies q"

| p | q | $p \Rightarrow q$ |
|---|---|-------------------|
| T | T | T |
| T | F | F |
| F | T | T |
| F | F | T |

ThinkIT
COMPUTATIONAL LOGIC

BIDMAS

$() \times y \div x + -$

Computer Arithmetic
The Science of Algorithms

Logic Gates & Diagrams

- Create the logic gate symbols for AND, OR, NOT
- Identify the following Boolean operations:

$$A \wedge B \quad A \vee B \quad \neg A$$

- What is the value at Y? Why is this?

- What is the alternative name for a NOT gate?
- How many input rows would you require for an AND gate?
- What would the output be for two NOT gates in series if the first input = 0

Why Binary?

- What is the link between transistors and binary?
- How many states can a binary system have?
- How many combinations could a 4 bit system have?
- What is the connection between False and 0?

Truth Tables

- Draw the truth tables for AND, OR, NOT gates
- Draw the truth table for this series of logic gates

Computer Arithmetic

What is the answer to the following:

- width = 10, length = 5 **area** = width * length
- gross = 100, VAT = 20, **net** = gross + VAT
- allHeight = 40, groupSize = 20, **aveHeight** = allHeight / groupSize
- salePrice = 128, commission = 10%, moneyRec = salePrice - commission

- totalIncome = 75, days = 7, totalIncome **MOD** days
- ISBNnum = 132, digits = 10, ISBNnum **DIV** digits
- **2^5** =
- What is the difference between MOD and DIV?
- What is the answer to 5 + 6 / 2
